Sweeping blade produces a gentle arc incision rather than a puncture. Less pain, bruising and quicker healing.

- Sterilised by EO
- Protective shield to avoid accidental triggering before use

Convenient

- Ergonomic design with press trigger
- Easy to hold with gloved hand
- Precise placement of puncture site with indicator and tapering design
- Trigger button on top of device means patient contact is maintained during operation

Test Procedure

1. Precision puncture placement control
2. Non-slip design
3. Ergonomic shape for ease of use
4. Indicator to aid puncture precision

After use, dispose heel lancet in an appropriate sharps container.
